

What is TeamWork Live?

TeamWork Live is a web-based project collaboration tool that helps you run your projects more effectively. Use TeamWork Live to assign tasks, share files, track time, centralize discussions, and keep your team members and clients in the loop. With TeamWork Live, you spend less time managing your projects and more time growing your business.

TeamWork Live is secure and easy-to-use. The service is hosted so there is no software to install or support. All you need to get started is a web browser and an internet connection.

Benefits of TeamWork Live

Pain Point	TeamWork Live Feature	Benefit
Difficulty establishing accountability for action items	Task assignment and tracking; At-a-glance dashboard	Know what members are responsible for completing and by when
No central location for storing and sharing documents	Web-based document repository	Find relevant documents quickly and access them from anywhere
Time wasted on status updates during meetings	Project reports; History log of user activity	Spend less meeting time on updates and more time making decisions
Discussions sent to everyone, resulting in email overload	Project-specific discussion threads	Follow only the discussions that are relevant to you
Confusion about agreed upon decisions and discussion points	Comments and messages	Centralize communication so decisions and important discussions are captured and accessible
Missed deadlines	Project calendars; Email notifications and alerts	Focus on the things that need to be done to move the project forward
Tedious to set up projects	Project templates	Save time by not having to reenter information for each new project
